NETSUITE FEATURES

Financial Management

Includes Account Ledger, Accounts Payable and Receivable, Fixed Assets Management, Multi Currency Management, Revenue Management, Budgeting, Financial Reporting and much more

Supply Chain and Inventory Management

Offers you a complete supply chain module including Warehouse Management, Inventory Management, Procurement Management and Purchase.

Manufacturing

Within NetSuite is a detailed tool to capture all stages from raw material to finished good, tracking inventory and costs along the way. It runs with the accounting backbone and takes care of all the general ledger postings on its own.

Order and Billing Management

Easily tracks orders and simplifies your billing process. It helps you to improve quote accuracy and speed invoicing. NetSuite eliminates manual entries and saves time.

Shipping and Fulfilment

Easily integrate with top shipping service providers including FedEx, UPS, and USPS, allowing you to manage your shipping using a single platform. NetSuite ERP will increase your efficiency and lower your fulfillment order processing costs.

Revenue Recognition Management

Helps companies comply with accounting standards and report financial results in a timely manner. Automate revenue recognition with financially intelligent capabilities to report results in accordance with accounting standards.

E-Commerce, Marketplace

SuiteCommerce is a unique tool for modern retailers. It provides an e-commerce/marketplace platform within the ERP suite, with absolutely no need of integration. This is easy to manage and maintain, and has proven to be the best tool to track online shoppers' trends.

Analytics and Reporting

Helps you to eliminate guesswork and drill real-time reports. NetSuite Analytics gives you clear visibility of your Business Performance.
